

VIVA REPORT

Viva Report	
Student Name	Aravinthkrishna A
Project Title	TNSDC RIO-125: Project -1 Developing Web Application on AWS

Top 5 learning/takeaways :

1) Practical experience with AWS:

The internship provided hands-on experience with AWS services, allowing for a better understanding of how to utilize them effectively in web application development.

2) Infrastructure setup on AWS:

Through creating an S3 bucket, provisioning an EC2 instance, and configuring networking with VPC, the internship offered insights into setting up a web application infrastructure on AWS.

3) Hosting static and dynamic websites:

By hosting a static website on S3 and a dynamic website on an EC2 instance, the internship showcased different approaches to hosting web content on AWS.

4) Troubleshooting skills:

Overcoming challenges related to infrastructure setup and configuration enhanced problem-solving and troubleshooting abilities, which are valuable skills in real-world scenarios.

5) Documentation and organization:

The internship emphasized the importance of maintaining documentation and following project management practices, enabling better organization and collaboration throughout the project.
